

METERRA HOTEL ON WHYTE

10451 82 Avenue NW Edmonton, Alberta

This luxury downtown hotel underwent a full building LED retrofit to reduce its annual lighting operating expense from \$21,630 to \$6,755. The 68% reduction in energy consumption was the result of replacing 1520 fluorescent, halogen, and CFL lights to Energy Star and DesignLight Consortium qualified LEDs.

CLP's proposed lighting solutions carefully considered the aesthetics of the hotel to ensure the respective ambience was maintained. In creating customized lighting solutions, we prioritize client needs and work closely with management.
